Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-48 are rejected under 35 U.S.C. 102(b) as being anticipated by Inada.

Inada teaches a reservation system terminal that can execute in parallel mode a plurality of process which are displayed in multi-window fashion (reference Abstract). Inada further teaches examples of the processes carried out in each of the window of the multi-window environment include a data designation process (reference column 9 and Figure 4) (calendar section). Another example includes an image of a seating chart (Figure 9 and columns 15-16) (inventory information section). Another example includes a reservation reference process (Figure 10 and columns 17-18) (reservation information section).

Inada further teaches the system useable for air travel, concert events, hotel reservations and any other process where reservations are required. In addition, Inada teaches that information inputted by the operator or from the host computer can be transmitted to other process (i.e. other windows in the multi-window environment) (column 8; lines 33-42). In other words, data input via one window, updates the information in the other windows in real-time.

Examiner notes that claims 1-16 are drawn to the method for formatting inventory data, claims 17-32 are to a computer apparatus for performing the method of claims 1-16 and claims

Art Unit: 3627

33-48 are a system for performing the method of claims 1-16. As such by adequately rejecting the method claims (1-16) the Examiner has also rejected any system for performing that method.
